COFFEE CO.

PROPOSAL FOR COFFEE SHOPS · ORDERING, PAYMENTS & LOYALTY

Your coffee shop, *without the line.*

A complete ordering, payment and loyalty system for your shop. Customers order from their table, your team works from one screen, and every visit becomes data you can use to bring customers back. Proven in a month of real, high-volume service.

THE CHALLENGE

- **Peak-hour lines** that make customers wait, or walk away.
- **Orders lost or mixed up** when everyone arrives at once.
- **No customer data**: you don't know who your regulars are, or how to bring them back.

OUR SOLUTION

- **Order from the table**: customers order on their phone and get a message when it's ready.
- **One screen for your team**: phone and counter orders in a single, live list.
- **Loyalty and payments built in**: rankings, rewards and payments in digital dollars.

PROVEN RESULTS

Case study: one month running the coffee bar at Island DAO, a tech event in Florianópolis, Brazil

1,500+	100%	5 → 0 min	115
coffees served in one month	of orders placed through the app by the end of the month	waiting time in line at peak hours	customers active in the loyalty program

01 What we implement in your shop

Customer ordering app
Your menu, with your brand, on the customer's phone: drinks, options, sold-out items and opening hours. Inside Telegram, a free messaging app like WhatsApp: nothing to install.

Staff order screen
Every order in one live list, from phones and from the counter. Stock, limits per customer and opening hours, managed with one tap.

Reports & finance
Sales per day, busiest hours, best-selling drinks, costs, income and profit, plus ready-made posts for your social media.

Loyalty program
A live ranking of your best customers, a board for your top supporters, collectible digital medals and reward points that bring customers back.

Digital-dollar payments
Tips and products paid in USDC, a digital dollar (1 USDC = US$1). It arrives in seconds, costs cents and goes straight to your account.

Your own product line
Sell your coffee beans with your shop's label inside the same app, with stock and pick-up control at the counter.

02 How we roll it out

STEP 1
Setup
We configure your menu, brand, opening hours and payments.

STEP 2
In-store launch
QR codes on tables and at the counter, and a walkthrough for your team.

STEP 3
First weeks
We follow every day of service with you and adjust what's needed.

STEP 4
Grow
Monthly reports and loyalty campaigns to bring customers back.

03 What you need

A phone or tablet
at the counter, for the staff order screen. It runs in the browser.

Your menu
drinks, options and opening hours. We set it up for you.

A digital wallet
to receive payments in digital dollars. We help you create it.

Nothing for customers
they use the phone they already have. No app to download.

Let's bring it to *your shop.*

Book a 20-minute demo and see the system running with your own menu.
